<u>Activity Development Worksheet</u>

Please complete this worksheet and submit it to the CME Office by June of each year. This form only needs to be completed for one lecture during the year.

List your best example of a lecture that occurred during the past year that fits each category listed below:
Competency: - Lecture Title:
- Date:
- Speaker:
Performance: - Lecture Title:
- Date: - Speaker:
Patient Outcomes:
- Lecture Title: - Date:
- Speaker:
Based on one of the lectures listed above, what is the professional practice gap being addressed? A practice gap is defined as the difference between actual and ideal performance and/or patient outcomes.
1. Where are physicians now? (i.e. what is currently taking place or being practiced?)
2. Where should they be? (i.e. how or what should physicians be practicing instead?)
3. Where did you get the answers to these questions? (i.e. journal articles, national initiatives, quality improvement data) *Please attach documentation for where these answers come from. i.e. website, journal, QI data, etc.
Based on the desired result, name 1-3 changes you would like to see attendees make in the way they deliver patient care as a result of this program (i.e., behaviorally stated objectives).

## **Desirable Physician Attributes**

Please "✓" only the competencies that apply to your activity. (NOTE: It is **not** a requirement for all competencies to be met)

## **ABMS/ACGME**

	Patient Care and Procedural Skill that is compassionate, appropriate, and effective for the treatment of health problems and the promotions of health.
	<b>Medical Knowledge:</b> established and evolving biomedical, clinical, and cognate (e.g., epidemiological and social behavioral) sciences and the application of this knowledge to patient care.
	<b>Practice Based Learning and Improvement</b> that involves their own patient care, appraisal and assimilation of scientific evidence, and improvements in patient care.
	Interpersonal and Communication Skills that result in effective information exchange and teaming with patients, their families, and other health professionals.
	<b>Professionalism</b> as manifested through a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to a diverse patient population.
	<b>Systems-based Practice</b> as manifested by actions that demonstrate an awareness of and responsiveness to the larger context and system for healthcare and the ability to effectively call on system resources to provide care that is of optimal value.
<u>Natior</u>	nal Academy of Medicine
	Provide Patient-centered Care: identify, respect, and care about patient differences, values, preferences, and
	expressed needs; relieve pain and suffering; coordinate continuous care; listen to, clearly inform, communicate with, and educate patients; share decision making and management; and continuously advocate disease prevention, wellness, and promotion of healthy lifestyles, including a focus on population health.
	Work in Interdisciplinary Teams: cooperate, collaborate, communicate, and integrate care in teams to ensure that care is continuous and reliable.
	<b>Employ Evidence-based Practice:</b> integrate best research with clinical expertise and patient values for optimum care, and participate in learning and research activities to the extent feasible.
	<b>Apply Quality Improvement:</b> identify errors and hazards in care; understand and implement basic safety design principles, such as standardization and simplification; continually understand and measure quality of care in terms of structure, process and outcomes in relation to patient and community needs; and design and test
	interventions to change processes and systems of care, with the objective of improving quality.  *Utilize Informatics:* communicate, manage knowledge, mitigate error, and support decision making using information technology.
Interp	rofessional Education Collaborative
	Values/Ethics for Interprofessional Practice: work with individuals of other professions to maintain a climate of
	mutual respect and shared values.
	<b>Roles/Responsibilities:</b> use the knowledge of one's own role and those of other professions to appropriately assess and address the health care needs of patients and to promote and advance the health of populations.
	Interprofessional Communication: communicate with patients, families, communities, and professionals in
	health and other fields in a responsive and responsible manner that supports a team approach to the promotion and maintenance of health and the prevention and treatment of disease.
	<b>Teams and Teamwork:</b> apply relationship-building values and the principles of team dynamics to perform
	effectively in different team roles to plan, deliver, and evaluate nation/nonulation-centered care and

population health programs and policies that are safe, timely, efficient, effective, and equitable.
