

**Preset Goals  
OBGYN Clerkship  
2014**

- 1. Students will provide care for obstetric patients in the outpatient setting and be able to educate them on the appropriate rationale for and timing of antenatal testing, warning signs and symptoms and the means to optimize pregnancy outcomes.**

*Each student will see at least 2 ante partum patients in the clinic setting.*

- 2. Students will care for a woman throughout the progressive stages of labor and be able to evaluate labor progress and status of the fetus.**

*Each student will care for at least 2 laboring patients.*

- 3. Students will scrub in and actively participate in the care of a woman in the second stage of labor undergoing a vaginal delivery.**

*Each student will participate in a least 1 vaginal delivery.*

- 4. Students will actively care for a patient requiring a cesarean delivery by scrubbing in and participating in the surgery and if possible caring for the patient preoperatively and or postoperatively.**

*Each student will participate in the surgery and pre or post operative care of at least 1 patient undergoing a cesarean section.*

- 5. Students will actively promote breastfeeding and educate ante partum or postpartum patients about the neonatal and maternal benefits of breastfeeding in the outpatient and or inpatient settings.**

*Each student will educate at least 2 patients in the benefits of breastfeeding.*

- 6. Students will care for women in the childbearing years in the outpatient and or inpatient settings and be able to discuss family planning and make recommendations about appropriate methods of birth control for their patients.**

*Each student will counsel at least 2 patients in family planning.*

- 7. Students will be educated on preventative health screening for women throughout the lifespan and have opportunities to educate women on disease prevention, health maintenance and other means of optimizing their health.**

*Each student will participate in the health care education and screening of at least one patient.*

- 8. Students will provide care for woman requiring a gynecological exam for either well woman care or for workup of pathology and will have opportunities to actively participate in this examination on women in an outpatient setting.**

*Each student will perform at least one gynecological exam.*

- 9. Students provide care for women with a variety of gynecological pathology and will have opportunities to scrub into surgeries and care for patients in the postoperative phase of their care in the inpatient setting.**

Each student will care for at least one patient with a gynecological cancer and at least one patient with either a urogynecological condition or a non malignant gynecological condition.
